SUMMARY

Computer Science Engineering student with a strong foundation in Java, Python, SQL, Data Structures and Algorithms, Object-Oriented Programming, and software development, with experience building practical applications such as a Weather Application and Gesture-Controlled Presentation Tool. Applies problem-solving and programming skills to develop efficient, scalable solutions that address real-world needs.

SKILLS

Programming: Java, Python, SQL

Backend: Spring Boot, REST API, Hibernate, Servlets, JSP, JDBC

Frontend: HTML, CSS, JavaScript

Database: MySQL

Tools & Technologies: Git, GitHub, Maven, Postman, VS Code, Eclipse

Core Concepts: Object-Oriented Programming, Data Structures, Database Management, MVC Architecture

EDUCATION

Bachelor of Technology in Computer Science 2025 – Present
Gayatri Vidhya Parishad College of Engineering, Visakhapatnam **CGPA: 9.02**

Diploma in Computer Engineering 2022 – 2025
Maddi Bala Tripura Sundaramma Government Polytechnic, Guntur **Percentage: 92%**

PROJECTS

Gesture Controlled Presentation

- Engineered a real-time computer vision system to control presentation slides using hand gestures, eliminating the need for physical input devices.
- Processed webcam feeds via OpenCV and extracted hand landmarks using MediaPipe, leveraging NumPy to analyze spatial coordinates and movement tracking.
- Implemented 5 distinct gesture controls: slide navigation (thumb/pinky), real-time on-slide annotations and erasing (index/index-middle fingers), auto-sliding (4 fingers), and camera toggling (5 fingers).
- Rendered dynamic screen overlays and digital drawings directly onto video frame surfaces using OpenCV drawing functions and landmark coordinates.

Weather Application

- Built a responsive weather dashboard using HTML, CSS, and JavaScript, leveraging the Geolocation API to automatically fetch live weather data for user locations.
- Integrated OpenWeatherMap API and parsed JSON responses to track real-time metrics including humidity, visibility, sunrise/sunset times, and wind speed.
- Implemented a 4-day forecast with 3-hour interval predictions and integrated Chart.js to visually render weather trend analytics on dynamic graphs.

CERTIFICATIONS

Data Structures and Algorithms using Java Certification – ScholarHat

Technology Job Simulation Certification – Deloitte
